Need a discount on your oil purchase? How about getting it for FREE! Participate in our social media competition for a chance to win a Free Elf oil change from IPT stations. [Learn more](#)

An advertisement for IPT DIESEL featuring a red heart held in a gloved hand on the left. The background is a light, textured surface. On the right, the text "IPT DIESEL" is displayed in a blue box. Below this, the Arabic text "بدفّي قلب البيت" (Feed the heart of the house) is written. Underneath are three icons: a car, a factory, and a house, each with a label below it: "للمركبات" (for vehicles), "للمصانع" (for factories), and "للمنازل" (for homes). In the bottom left, there is a green leaf icon and the text "مازوت أخضر أوروبي" (European Green Diesel). At the bottom, a phone number "76 733 337" is displayed next to a small truck icon. The "EURO standards" logo is also visible in the top right area.

To help allay the country's fuel crisis, "Save and Ride" allows bus passengers to receive a discount at several businesses that have joined the project.

What's Happening:

- Lebanon bus rewards aim to boost use of public transport
- Fossil fuel industry has largest delegation at climate summit
- Oil gains after U.S. infrastructure bill, plans to address prices
- Trump's former energy secretary claims Biden's policies could lead to 'disaster'
- Global reservoir analysis market size is projected to reach \$11.96 billion by the 2026

✓ SAVE ENERGY EVERYDAY

Myth: Turning down your hot water heater is a mistake because it takes more energy to heat the water back up after it has cooled.

Fact: Your water heater is an energy-gulping monster. It is important to avoid running it at all times, to be able to save important amounts of money. While it does take energy to heat the water tank up to temperature, it is more than offset by the savings of not operating it at all, even for a short period.
