

## End Of Year Package 2023

As a company established during the Lebanese war in the seventies and has been thriving for over forty years, IPT is no stranger to turbulent times. As Lebanon deals with its economic and social crisis, the world is facing the effects of Covid-19 pandemic, severe weather, trade disruptions, a Russian invasion of Ukraine, and the list goes on. Amidst all of that, we have to focus on what matters most: making sure we service our stakeholders and provide energy.

Throughout the difficult times that Lebanon has been undergoing since 2019, IPT has proved itself as a leader in its industry, ensuring continuity and

resilience in servicing its customers. We have adapted and re-adapted in the aim of staying relevant and reliable in supporting our community.

In our most recent venture in the UAE, we are upholding the same values and implementing them in our business. We strive in adversity and turn challenges into opportunities and successes. While the rules of business and the challenges faced in Lebanon and outside are different, IPT's expertise and perseverance are uniform across geographies.

### **Khallina 3a Ittisal - 43rd Issue:**

## #Energy\_Library

Dubai Electricity and Water Authority (Dewa) on Monday said around 58.48 per cent of work on its Dh1.42 billion pumped-storage hydroelectric power plant being built in Hatta has been completed. The power plant will have a production capacity of 250 megawatts (MW), a storage capacity of 1,500 megawatt-hours and a life span of up to 80 years. This is the first station of its kind in the GCC and is planned for completion in Q4 of 2024.

The plant supports the comprehensive development plan for Hatta to meet the social, developmental, economic, and environmental needs as well as provide innovative job opportunities for Emiratis in Hatta.
